

# What Could Be Hiding In Your Chimney?

## Have You Ever Looked Up Into Your Flue?

Why not give it the chimney sweep's check? Look up into the flue from the bottom and, if possible, the top using a trouble light or flash light. If you see  $\frac{1}{8}$ " of crusty black or blackened deposit or even  $\frac{1}{16}$ " of smooth, shiny, or tar-like deposit, it is time to consult a professional.

## Marcel's Chimney Cleaning

## Your Safety Inspection Checklist

- Are you aware of general deterioration in your chimney?
- Can you see any missing or loose bricks?
- Do you know how to spot water penetration?
- Is there a smell of creosote coming from your fireplace during or after use?
- Is your woodstove free of cracks?
- Do you know how to make sure your fireplace insert and/or woodstove is safe?

If any of these factors are questionable you need the services of a competent professional. Marcel's Chimney Cleaning is a certified chimney sweep company who has the knowledge and skill to design or perform the needed changes. A safe and sound heating system will pay off in comfort and security all winter long.
